

**JOE DOVINH**

City Council Member

Dear Coast Community College District Students, Families, Teachers and Administrators:

As our workforce requires higher demands for professional, skilled workers, a college education should be accessible for all residents. As a city councilmember, I understand that responsible leadership and innovative strategies are critical to providing quality education at affordable rates. I have a track record working with government, committing to a balanced budget, advocating that the public be informed and participate in the decision-making process.

I campaigned and debated for this position when I first ran in 2004 twenty years ago. I know the issues well. I will provide continuity and consistent leadership. I have taught community college and understand the needs of students and educators. I come from a family of educators, on my side and my wife's side. I support bridging qualified high school grades as future college credits. I hold a Doctor of Law degree. You can count on me to take advocacy positions on public policies and legislation that protects and promotes our students and local colleges. I humbly ask for your vote.
