

BARBARA GASTELUM

Registered Cardiac Sonographer

My name is Barbara Gastelum and I have lived in La Habra for over 39 years and raised 3 children who are successful adults because of the education they received in La Habra schools. I am a registered cardiac sonographer. Know what it takes to be successful, and I share the concerns many of you have about the education your children.

My priority is to improve our educational system by encouraging intellectual growth and critical thinking by all students. We must ensure that our educational system remains a positive force so that our country continues to prosper in the future. I encourage parents to comment and suggest how our schools can improve. I will ensure the district provides additional resources for students who need them. I want to be transparent in how we use our tax dollars and eliminate wasteful spending so that every dollar is used for education, not indoctrination.

Your choice at the polls is your statement to uphold the importance of your children's education and the values we want for our children's future success. I believe I am the right candidate to be on the La Habra School Board. I would be honored to have your vote.
