

**JENNIFER ENGLE****Construction Project Manager**

I have been in construction management for over a decade & hold a degree in Mechanical Engineering from the California Maritime Academy. Throughout my career I have worked on everything from wind turbines & houses to coffee shops & gas infrastructure, in California as well as Texas, Virginia and Florida. Doing so has honed many skills which will enable us to get our budget under control, improve our biking infrastructure & public transit system.

Collaboration, bringing folks with competing interests together to accomplish a common goal. Balancing the needs of everyone to work through the problems and once everything is said and done they are ready and willing to do it all over again.

Scheduling & Budgeting, working out all the various parts which must fit together and function like a well-oiled machine. Managing expectations, obtaining commitments, and providing realistic forecasts are key to correctly managing large projects and organizations.

But above all is my ability to build trust and confidence. I follow through on my commitments, I push back when needed, and I own my faults. Trust is a hard thing to earn but I will work hard to gain the trust of the citizens of Aliso Viejo.
