

**GAYEL KAPLAN**

Attorney at Law

I have lived in Cypress for over 40 years. It is the city, I chose to raise my children in, the city, I love. Change is inevitable but how do we manage that change? I am running to implement a better vision for Cypress today and tomorrow.

I am very concerned about the State of California mandating 4,000 new residential units for our small city. We are a drought area. What provisions have been made to address the added demands on our water in supplying these new units? Will a recirculating gray water system be incorporated into the architectural building plans? Will solar energy be required for these units? What about architectural design, parking, green spaces, traffic flow, congestion and air quality?

We need independent, nonpartisan representation on the City Council. I am not tied to any special economic interest.

If your concerns are similar to mine, concerning our city, I respectfully ask for your vote; to represent your voice and our future on The Cypress City Council.

Thank you.
