

TRI LAM

AGE: 48

Biomedical Engineer

My name is Tri Lam, and I am a veteran who served for eight years in the United States Army, including one year deployed in Iraq. My commitment to serving my country and community has always been the guiding principle in my life. After receiving an honorable discharge, I pursued my passion in the healthcare field and completed a Bachelor's degree in Biomedical Engineering. Currently, I hold the position of Medical Equipment Technical Supervisor at Saint Joseph Hospital, where I have accumulated over ten years of experience in managing healthcare technology, ensuring that patients receive the best care possible. I am now running for the position of District 6 City Council Member with the desire to continue serving our community. I have witnessed the challenges our district is facing, from public safety issues to economic development. I believe that my military experience and background in healthcare management have equipped me with the ability to effectively tackle these challenges.

If elected, I will:

Continuously strive to create a safe and prosperous environment for our residents and businesses. I believe in listening to the concerns of voters and collaborating to find practical solutions that benefit everyone in the community.

Promote economic development and create job opportunities for residents while ensuring strong public safety policies to protect families and businesses.

I will be proud to represent the residents of District 6 and am committed to serving the community with the same level of dedication that I demonstrated in the United States Army.

With your support, I believe we can build a strong and vibrant community that serves everyone.
