

JAMES PING-YA TUNG
Retired Geologist/Geophysicist

In 2012 I moved to Laguna Woods with my wife after having retired as a geophysicist . Two years later I was elected to Third Mutual Board , where working with others we helped reduce water waste by personally checking for water leaks. Our persistence paid off for eventually we saved \$600,000 by locating and addressing those pesky shower and toilet discharges.

While serving as a director on Third Mutual, I also learned about the needs of our community as well as the challenges facing our residents. I pledge to serve our community by improving communication between the city and the residents. I also pledge to work toward expanding our senior mobility program. Additionally, Public Safety is a top priority for me and I support traffic oversight and enforcement to reduce excessive vehicle noise.

I believe my education, I have a PH D in geophysics , my experience understanding budgets and finances, and my history of working well with others help prepare me for the City Council position. I ask you for your vote.
