DENIS BILODEAU **AGE: 56**

Director, Orange County Water District Division 2

It is a privilege to serve as your representative on the Orange County Water District. This agency manages our vital groundwater basin, which is the source of 85% of our water supply.

I am a licensed Civil Engineer, trained in water resources. Since you elected me four years ago I have kept my commitment to ensure our drinking water remains pure, plentiful, and affordable. We expanded our advanced water purification system, the Groundwater Replenishment System, on time and within budget. The facility now produces 130 million gallons a day of a new, high-quality water source for Orange County residents. Safeguarding our precious aquifer is my top priority. We test to ensure our water supply is free of contamination. I will continue to hold polluters accountable for groundwater contamination. Additionally, I initiated a groundwater cleanup project in North Orange County and have recovered millions from the responsible polluters.

With your continued support, I will keep our water supply uninterrupted for the lowest price possible. I am proud to be endorsed by the Orange Taxpayers Association.

I respectfully ask for your vote,

Denis Bilodeau
