

CRYSTAL K. MILES**AGE: 57**

Councilmember/Business Owner

Transparency, accountability, and earning people's trust aren't new goals for me — they're how I've always led, as a city councilmember and small business owner. Families deserve a school system that treats every taxpayer dollar with the same discipline and care you would in running your household or business.

I strongly support parent rights and full access to curriculum information. Parents are partners in their children's education, not outsiders, and deserve a real seat at the table.

If elected, I will make sure teachers have the support they need, open district spending to real public scrutiny, and focus on improving academic outcomes for every student regardless of background or ability.

My experience on the City Council, running a business, and raising my own sons in this district has taught me how to manage budgets responsibly and hold organizations accountable.

On the Villa Park City Council, I initiated our city's e-bike ordinance to help keep kids safe on our streets, proof I get results, not just talk.

Only 46% of our students are proficient in math. Our children deserve better!

I'd be honored to have your vote.
