HECTOR BUSTOS

Governing Board Member, Santa Ana Unified School District, Trustee Area 5

As a proud product of the Santa Ana Unified School District, serving on the School Board has been the honor of my life. When I was elected four years ago, I was a recent college graduate who ran for office because I believed our schools deserved student-centered leadership.

As School Board President, we delivered the district's strongest academic gains in over a decade, protected essential student services despite severe underfunding, strengthened college and career programs that prepare our students for the future, and partnered with UC Irvine to create a model elementary school that brings the latest research into the classroom.

I'm proud to be the candidate in this race endorsed by the Santa Ana Educators Association and the California School Employees Association. These associations represent thousands of employees, including our teachers, counselors, cafeteria workers, special education professionals, and campus safety officers. Their support reflects the trust we've built and my commitment to the workers who serve our students daily.

Parents have always played a critical role in the decisions I make. Santa Ana families support my re-election because we've made responsible use of their taxpayer dollars by creating safer schools, expanding mental health support for students, and modernizing aging school facilities.

With your support, we'll continue building the high-performing schools our students deserve.
