**AMY CHOI-WON** **AGE: 50**

Parent/Foundation Boardmember

For nearly two decades, I have proudly served the Fullerton School District community as a parent, volunteer, advocate, and neighbor. My commitment to public education is both personal and professional because I believe every child deserves the opportunity to succeed.

I earned my Ph.D. in Chemistry from UC San Diego and have dedicated my career to helping students prepare for bright futures. As a chemistry professor, small business owner, and Partner Engagement Specialist with the North Orange County Regional Occupational Program, I have connected students with meaningful career pathways and strengthened partnerships between education, business, and our community. I also serve on the boards of several Fullerton nonprofit organizations.

As your Trustee, I will focus on strengthening academic fundamentals, expanding STEM and career education, preparing students for an AI-driven future, supporting and retaining exceptional teachers, improving communication with families, and ensuring responsible stewardship of taxpayer dollars.

Every child deserves access to an excellent education regardless of their ZIP code or background. Strong public schools create stronger families, a stronger workforce, and a stronger Fullerton.

I would be honored to earn your trust and your vote.
