

JOHN NGUYEN

Engineer/Environmentalist

Although I was born in Kansas, I was raised in Fountain Valley, attending Ethan Allen Elementary School in the 1980s and 1990s. I know what living in Fountain Valley is all about. People here want to live in a safe, crime-free community where families can raise kids.

After obtaining my undergraduate degree in electrical engineering and my graduate degree in chemical engineering, I worked to prevent harmful emissions that can cause serious health effects. I believe people should be able to live without the fear of the environment harming them or their loved ones.

I also believe community safety is a fundamental right. Key to safety is having a strong community working harmoniously together to prevent crimes. As a city council member, I will work to foster a stronger community by harnessing and embracing Fountain Valley's diversity, while refraining from divisive politics.

I respectfully ask for your support and vow to listen to everyone. Together, we will make Fountain Valley better.
