

MILES C. MATIAS
IT Analyst/Instructor

AGE: 33

I am a husband, father, educator, and information technology professional who believes public service should begin with giving, not taking. My family and I proudly call La Habra home, and I am running for City Council to bring practical experience, fresh ideas, and accountable leadership to City Hall.

I support reasonable term limits because elected office should be temporary public service, not a lifelong career. New voices and fair opportunities to serve strengthen local government. I will advocate for a meaningful term-limits measure.

If elected, I will not personally keep City Council compensation. I am running because I love this community and believe public service should be rooted in sacrifice, integrity, and commitment rather than personal gain.

I hold bachelor's and master's degrees in information technology and management, teach college technology courses, and have experience in private industry, state government, healthcare, cybersecurity, and public service. I will focus on fiscal responsibility, public safety, reliable infrastructure, transparent government, strong local businesses, quality parks, support for families, and responsive city services.

I would be honored to earn your trust and respectfully ask for your vote.
