PEER A. SWAN
Director, Irvine Ranch Water District, Area 5

As a Director of the Irvine Ranch Water District for 46 years, I have played a large role in making the District a nationally recognized leader. We pioneered the use of recycled water, promoted conservation, funded a program to replace worn-out plant and equipment, fully funded retirement, and built a large emergency groundwater storage facility.

IRWD has gone from 95% dependency on expensive imported water to where more than 85% of our water is local, more reliable and less costly.

We have achieved this high level of service and reliability while maintaining rates that are by far the lowest in the County.

I spearheaded the creation of the San Joaquin Wildlife Sanctuary where urban runoff is naturally treated, while providing needed habitat and accessible public open space.

As a Founding Director and Chairman for four years of the National Water Research Institute we funded research to improve water quality.

You have my continued commitment to keep the District an innovative leader dedicated to quality service that is low priced, environmentally sensitive, and consistent with the high standards of the community we live in.

Please Re-elect Peer Swan
