JOEL BISHOP
Business Owner/Consultant

For 14 years, I have proudly called Laguna Niguel home and have actively served our community through volunteer leadership with the City and the Orange County Sheriff's Department. Public service, to me, is about giving back—not politics. I am independent, have no political agenda, and seek no higher office.

I previously served ten years as an elected Director of the South Coast Water District, including three terms as Board President. During my tenure, I focused on long-range planning, fiscal responsibility, and major infrastructure projects requiring years of engineering, financing, and construction.

As a Director of the Moulton Niguel Water District, I will put that experience to work for you. My priorities are straightforward: provide excellent, reliable service while keeping rates in check; protect the quality and reliability of our water supply; strengthen regional cooperation to ensure adequate water during droughts and emergencies; and safeguard our critical infrastructure against cyberattacks and physical threats.

Reliable water is essential to our homes, businesses, and quality of life. I have the experience, judgment, and proven record to help keep our District financially strong, secure, and prepared for the future.

I respectfully ask for your vote.

Joel Bishop
