

OPEN HOUSE PRESENTATIONS

Presentations repeat throughout the evening
Please hold all questions until the end of a presentation

A CHECK-IN

B TALLY ROOM

After ballots are scanned either centrally for Vote-by-Mail ballots, or in-person at the Vote Centers, the ballots are saved onto a vDrive and brought into this tally room to be tabulated.

C BALLOT SIGNATURE CHECKING

Every returned Vote-By-Mail ballot and provisional ballot undergoes the signature verification process.

D 1% AND RLA

The 1% Manual Tally is a post-election audit performed before certifying the election to ensure the accuracy of the election results. The RLA is conducted as an additional auditing measure.

E LOGIC AND ACCURACY

A collection of procedures that ensure that the voting equipment and ballots to be used in an election can properly display the ballot, collect votes, and tabulate results.

F LOGISTICS

Activities that are conducted in the field, such as the collection of ballots from drop boxes and the return of ballots from Vote Centers, are tracked using Geographic Information Systems (GIS) technology to provide visibility into these critical tasks.

G BALLOT SORTING AND EXTRACTING

Once Vote-by-Mail envelopes have been signature verified, they are opened by trained ROV staff. After Vote-by-Mail ballot envelopes are received from ballot drop boxes, the Post Office, or Vote Centers, they are scanned and sorted for signature verification.

H BALLOT DUPLICATION

When original ballots are damaged or not marked properly, they need to be duplicated in order to be scanned into the voting system.

I SCANNING OF BALLOTS

In this room, Vote-by-Mail ballots are scanned in to be counted. Ballots that enter the scan room have been signature checked, extracted and visually inspected from the Vote-by-Mail ballot boards.

J VOTE CENTER BALLOT PROCESSING

At the end of each night during the voting period, Vote Center staff conduct strict ballot chain of custody procedures on all voted ballots.

K BALLOT DROP BOX

Teams of two trained staff members collect Vote-by-Mail ballots daily from ballot drop boxes throughout the county.

L BALLOT DROP BOX RECEIVING

This is where ballots collected from drop boxes are returned, and the chain of custody documents are verified.

M PREPARATION OF BALLOTS

After Vote-by-Mail ballots are extracted from their envelopes, they are prepared to be scanned for counting.

2024 PRESIDENTIAL GENERAL ELECTION OPEN HOUSE

OCT 8, 2024
4:00PM - 7:00PM

**VOTE EASY.
