

**RAY ROBERTS**  
**STATE ASSEMBLY, 67TH DISTRICT**

Voters of our district should look beyond partisan politics and choose our next Assemblyman based upon who will be the best representative of our interests and concerns. We need collaborative leaders not partisan warriors in Sacramento who are dedicated to solving problems and working for progress in addressing our state and local needs.

I pledge to bring common sense, integrity, and a strong work ethic to the job of serving you. Above all, I will listen and be responsive to you. You are my only special interest.

I have a strong business background with more than forty years of experience in the information technology industry; am proud of my military service in the U.S. Air Force; am a lifetime resident of Southern California, and have lived with my family in Huntington Beach since 1978.

I have an MBA from U.C. Irvine, and have been in various technical and management positions with IBM and start-up information technology companies. I know what it means to be successful in the business world and what it means to be a collaborative leader and a problem-solver.

My priorities include restoring our educational systems, improving health care, protecting our environment and supporting small business development. I will work for fair and effective resolutions to divisive issues like illegal immigration.

We need fresh leadership in Sacramento with a can-do attitude that will get things accomplished. I will help bring that to representing the 67th Assembly District.
