We need reform at CUSD.

Reckless deficit spending has created a self-inflicted, multi-million dollar budget crisis that puts our children at risk and resulted in massive program cutbacks -severely diminishing the quality of education.

I oppose the reckless spending of \$52,000,000 for a luxurious new administration building — while schools are in dire need of repair and students are crammed into substandard portable classrooms.

I don't want our community to continue paying for failed financial policies of the past. That's why I commit to you my 22 years of auditing, investigative accounting and tax services experience.

My expertise in long range capital and operational budgeting and cost accounting will allow me to ensure that scarce education dollars meant for our children actually reach them.

I will protect your tax dollars and restore fiscal transparency and responsibility.

As an advocate for students, teachers and taxpayers, I will support policies that promote and enhance:

strong public education;
high academic achievement;
collaboration between teachers, administrators and parents through professional learning communities;
safe, sanitary schools;
adequate classroom supplies; and
lower taxes.

I will work tirelessly to restore honesty, integrity and accountability to CUSD.
