

**JEFF ELGHANAYAN  
LAGUNA BEACH UNIFIED SCHOOL DISTRICT  
GOVERNING BOARD MEMBER**

I believe my education is the most valuable asset I have. I want to assure that the benefits I have drawn from my education will continue to be available to my children and the community at large. I had retired from active business when I moved to Laguna Beach to start a family here with the intention that this would make me available to participate in all the activities possible with my children as well as to support the community & institutions that they are involved in. I am a product of public and private schools and strongly believe that a well-supported public school is far superior to any private school education. The exposure to a broad cross section of the population is a critical force in developing a well-rounded perspective of the world for our students. I strongly believe the educational experience does not end at 3 pm. I have admired the involvement the schools in Laguna Beach have had in working with families to educate not just the students but the entire family. We never stop learning and we have so much to give and learn from our schools.
