

**FLOSSIE HORGAN  
CITY OF HUNTINGTON BEACH  
MEMBER OF THE CITY COUNCIL**

I believe the issues are:

**Clean Water:** the Council vote approving the Poseidon desalination plant sparked my candidacy. Our ocean waters are precious, both for our physical health and because of economic benefits our ocean brings through tourism. This plant will cost, not benefit, Huntington Beach. As cofounder of Bolsa Chica Land Trust, I know that we can maintain a healthy economy without selling our ocean to the highest bidder.

**Clean Government:** A City Council member occupies the highest position of trust. Although our Councilmembers can annually accept \$360 gifts per constituent, I will accept no gifts of any kind. I will never use the office for personal gain. My decisions will be based on facts presented, not on obligations to special interests.

**Clean Energy:** blistering, record-breaking temperatures here and worldwide demonstrate that global warming is a fact. Having taught biology for fifteen years at the college level, and as a current Huntington Beach Planning Commissioner, I will bring my knowledge and experience to the Council to implement strategies to reduce carbon dioxide emissions by increasing energy efficiency, conservation, and by using renewable energy sources. We can save taxpayer dollars at the same time.

I would appreciate your vote.
