

**EDWARD SELICH  
CITY OF NEWPORT BEACH  
MEMBER OF THE CITY COUNCIL, DISTRICT 5  
SHORT TERM**

As 27-year residents my family and I value the quality of life we have experienced in Newport Beach. I wish to continue to serve as a member of the City Council in order to help protect and improve upon the qualities that make our city such a unique and wonderful place to live, work and play.

Newport Beach is faced with a number of important issues. Most important is controlling future growth and development. Also important is the city's effort to have a voice in the operation and expansion of John Wayne Airport. Managing the bay, including dredging and water quality, traffic management, the new city hall, and the future of Marina Park are also important.

I bring a unique set of skills and experiences to the city council with over 25 years of continuous involvement in municipal government. I have experience as a director of a municipal planning and redevelopment agency and a planning and land use consultant. I served 10 years on the Newport Beach Planning Commission as well as numerous other city committees. These experiences provide me qualifications from all perspectives of municipal government that no other candidate possesses.
