

**MARILYN FRY
MIDWAY CITY SANITARY DISTRICT
DIRECTOR, FULL TERM**

People have a difficult time determining what the sanitary district board does. It's in the business of collecting garbage and trash for the dump or landfill after the items to be recycled are removed.

Sewers are also under the jurisdiction of the sanitary district. Changes in legislation at the state and national levels have enlarged the scope of work to be performed by your sanitary district. Many sewer lines are 50 years old and must be replaced before they break or leak.

The sewer lines are an immediate problem. Putting off the work causes costly problems to our environment and endangers the public's health. Our health is at stake when leaking, oozing, broken sewers infiltrate and destroy our water supply.

I will help the board make intelligent, economical decisions related to both sewage and trash. A big job to do! I am against any new taxes. The work can be completed with an intelligently planned work schedule.

I have attended the sanitary board meetings for four consecutive years. I know the problems. I know the fixes. I am well qualified to hold a director's seat.

You need a friend in this office... And that friend is:

Marilyn Fry
