

**SAUNDRA FRANCES JACOBS
SANTA MARGARITA WATER DISTRICT
DIRECTOR**

Saundra Frances Jacobs
Occupation: Environmental Planner

As a Director on the Santa Margarita Water District Board for the past 10 years, I have supervised growth in the level of service and reduction in rates nine times since 1996. During this time we have increased critical water storage from 86,000,000 gallons to over 240,000,000 gallons to meet the demands of our customers. We have implemented policy to ensure that our water supplies are safe from natural disasters and terrorism, reliable in times of drought, and affordable.

Our community needs leaders who have a demonstrated commitment to serving the public, have a strong sense of responsibility for protection of the environment, are good stewards of our creeks and beaches, and have a vision to plan for the future. I have demonstrated my commitment as Director, and as an environmental planner for over 20 years I have credentials to continue to meet the planning and environmental imperatives of the District. My strong commitment to serving the community, and tenure as a public official ensures that I am able to plan and implement sound environmental, water and governmental policy.

Thank you for your continued support.

Please Re-Elect Saundra Frances Jacobs, Director, SMWD on November 7th.
