

**MEMBER OF THE STATE ASSEMBLY, 68TH DISTRICT**

**NAME: KEN ARNOLD**

**AGE: 54**

**OCCUPATION:** Business Systems Analyst

I have lived in Orange County almost all my life, raised my two sons here and presently reside in Fountain Valley with my wife, Thanh-Thanh. I have almost 3 decades experience as a business systems analyst/designer, computer scientist and software engineer. I have cost-effectively solved problems, increased efficiency and profits for businesses of all sizes. I will bring unique experience, knowledge and talents to the legislature.

I am running to give back to this county and state that I love so much and to bring my insightful problem solving talents to the many issues presently facing the state. I intend to represent all the residents of the district and will be accessible and responsive to my constituents and open about my public actions. I will represent and serve the citizens and not special interests.

Top priorities are our present energy, education and health care systems that harm business competitiveness and inadequately serve the people. The economy and the state's budget are also high priorities. We face many challenges and threats but we of the greatest state of the greatest nation can and will successfully meet them.

I would legislate with common sense, utilizing economic principles and market forces to achieve the public good at least cost and with minimal government intrusion upon business and individuals. I will fight the culture of 'absolutism' that has infiltrated too much of our public life and thought, damaged our economy and crippled our government.
