

MEMBER OF THE STATE ASSEMBLY, 70TH DISTRICT

NAME: CHUCK DEVORE **AGE: 46**
OCCUPATION: California State Assemblyman, 70th District

Californians deserve better from their government.

Your state government spends \$41 billion more than it did four years ago, some 40 percent more than it did when Gov. Gray Davis was recalled. Are you getting 40 percent more in government services?

We have the highest income tax rate in the nation, the highest gas tax, and the highest corporate tax in the West and now Sacramento Democrats want to raise taxes by billions more.

I am the Assembly's lead Republican on tax policy. I have voted against billions of dollars in higher taxes that would hurt California's economy and drive jobs out of state.

For the two years I have led the effort to overturn California's obsolete 1970s ban on the construction on modern, safe, and clean nuclear power plants. Only nuclear power can replace the vast amounts of reliable power we now generate from coal and natural gas. Wind and solar cannot do it alone. California generates 42 percent of its electricity from costly natural gas which is why our electric bills are rising fast. We need nuclear power to reduce greenhouse gases and have a healthy economy. Each new reactor saves \$2 billion of natural gas annually and produces 24/7 power for our homes and businesses during the day with excess power to make hydrogen for vehicles and charge electric cars at night.

I would be honored to have your vote to continue to serve you in Sacramento.
