

MEMBER OF THE STATE ASSEMBLY, 73RD DISTRICT

NAME: JUDY JONES

OCCUPATION: Businesswoman/Educator

My three interrelated priorities: Education, Economy, Environment.

Education: A math teacher in the Peace Corps, and a volunteer in various youth/education non-profits, I value public education. K-12, community colleges and universities should be affordable and accessible to all, and guaranteeing educational benefits to veterans. I will work on solutions for equalization and special education funding. I support scholarships and incentives for those studying or teaching math or science. We need quality education to meet 21st century workforce needs.

Economy: I will promote incentives for new, green technologies to spur growth of California's economy, expanding our tax base to fund our educational improvements. I will support small businesses and entrepreneurs in our district. I will bring training dollars to our district for new technologies. I will work on solutions to health care, addressing the costs to businesses and employees.

Environment: Living in southern California 20+ years, I appreciate our high environmental standards. Our new green companies should lead the nation in solutions including renewable alternative energies, mass transit, water solutions and more. I will support smart growth, existing rent control, and preserving the character and beauty of our district. I will support saving our state parks and keeping our open spaces.

I bring over 30 years of business experience and an MBA from University of Chicago to address fiscal responsibility and accountability of our state institutions.

Endorsed by small business, parks, labor, women's organizations.

Supported by Democrats, Republicans, Independents.

I will be your accessible and accountable Assemblywoman.
