

**COAST COMMUNITY COLLEGE DISTRICT
GOVERNING BOARD MEMBER
TRUSTEE AREA 4**

NAME: CHARLOTTE PIRCH

AGE: 61

OCCUPATION: College Professor/Attorney

I believe that a quality education system is an essential component of a strong economy. California's economy is seventh in the world because of its investment in a strong educational system. Coast Community College District campuses are key components of our local economy that must continue to offer technical/vocational training as well as required classes for transfer to university.

I will work hard with my fellow Trustees to ensure that taxpayer money is wisely invested in quality faculty and staff, not wasted on excessive administrative costs. While maintaining its current high educational standards, Coast Community College District must also plan for the future by partnering with business to provide technical/vocational training for the coming "green economy".

My experience teaching at the college level, managing a business, and being a community activist will make me a Trustee that values taxpayers' hard earned money and works hard to see that it is invested in providing a quality education to all students.

I respectfully ask for your vote and I pledge to be a Trustee who manages your tax dollars as though they were my own.
