

**COSTA MESA SANITARY DISTRICT
DIRECTOR**

NAME: JIM FERRYMAN

OCCUPATION: Director, Costa Mesa Sanitary District

For the last two years, I have represented Costa Mesa on the Orange County Sanitation Districts' Board as chairman. Last December we christened the Ground Water Replenishment System that recycles 70 million gallons of waste water per day for our county to use as drinking water. The Orange County Sanitation District is working with the Costa Mesa Sanitary District to assist us in abandoning many of our 21 pump stations that will allow us to save money on energy costs.

The Costa Mesa Sanitary District has many special programs that benefit the residents such as, the large item pickup, the Christmas tree recycling program and the hazardous waste pickup, that I helped develop.

The Costa Mesa Sanitary District has established and upgraded its own headquarters building on 19th street that beautifies the city and makes us more efficient. Our trash collection rate has been frozen for two years to insure that we are competitive in the county.

I would like to continue my work on the Costa Mesa Sanitary District Board and ask you for your support on November 4, 2008.

Jim Ferryman

Director, Costa Mesa Sanitary District
