

**COSTA MESA SANITARY DISTRICT
DIRECTOR**

NAME: DAN WORTHINGTON

OCCUPATION: Orange County Waste Commissioner

You should be very concerned that our residential trash fees have now become the second highest of the 34 cities in Orange County. We also need to be alert to increases of our sewer rates in the last several years. The current Board has increased our sewer fees by 164% over eight years, demonstrating poor management and focus.

As a successful business owner, I understand how an organization needs to focus on costs of operation and run a "clean, lean machine" especially during tough times. As owner of a Costa Mesa business for over 25 years, I was the person who signed the front side of pay checks; my employees depended on my financial management skills for their job.

This Board has been concentrating on the increase of taxpayer funds instead of effectively managing the budget.

Now is the time for real change. Use my 14 years of trash and sewer expertise in both Costa Mesa and Orange County. Vote for Dan Worthington. Bring leadership back to this Board.
