

**MIDWAY CITY SANITARY DISTRICT
DIRECTOR**

NAME: FRANK A. COBO

OCCUPATION: Local Business Owner

As a fellow citizen of the Westminster/Midway City community, you know the Midway City Sanitary District provides our trash collection and sewer services.

We know the District has had good services and low fees. Also, I was an outside District contractor for five years and know its internal workings.

Unfortunately, with our troubled economy and more complicated State regulations, the District is now threatened with rising costs and growing pressures to increase our fees.

I'm running to represent you on the Board of the District to work for greater efficiencies and innovations to control costs, actually improve services... and, avoid rate increases.

Specifically:

A new curbside can for your green waste will enable green waste recycling, protecting our environment and helping meet State law.

Effective preventive maintenance of the District's four large lift pumps will reliably send our sewerage for treatment and disposal.

Sound, efficient management will keep your services up and your fees down.

I have worked, lived, owned my home and raised our family here for 22 years. I am dedicated to our community and have served in many ways.

I was honored to be named Westminster Citizen of the Year.
