

**IRVINE RANCH WATER DISTRICT  
DIRECTOR**

**NAME: DARRYL G. MILLER**

**AGE: 60**

**OCCUPATION:** Water Resource Consultant

My experience as Director of the Irvine Ranch Water District for the past 24 years, plus 37 years of professional experience addressing water supply and water quality issues, allows me to bring the expertise and knowledge necessary to provide for IRWD's current and future water needs. I serve as President of the IRWD Board of Directors and also serve on the water resources committee.

While providing you safe and reliable water, IRWD's water and sewer rates are constantly among the lowest in Orange County. Other accomplishments include an innovative and nationally recognized conservation program, development of our local groundwater resources, and expansion of our reclaimed water system for using water that would otherwise be discharged to the ocean.

As a geologist and water quality professional, I am keenly interested and experienced in protecting our water supplies from the influence of toxic waste products. Additionally, I am focused on expanding our groundwater supplies and expanding the distribution of our recycled water to offset the rising cost of imported water.

I pledge my continued commitment to control the District's costs and secure a reliable and safe water supply for our future needs.

Thank you for your continued support.
