

**MOULTON NIGUEL WATER DISTRICT  
DIRECTOR, DIVISION 3, SHORT TERM**

**NAME: DONALD FROELICH**

**OCCUPATION:** Water Resource Engineer

The California drought is impacting water supplies across the state, including this area. Experienced leadership is required to manage our water resources appropriately during this period. I have 30 years proven experience in managing water supplies during periods of drought and can minimize its impact to our community.

My goals are to:

Enhance planning for adequate supply of high quality water

Further drought- proof area water supplies

Expand water conservation and environmental projects

Operate in a fiscally conservative manner

Over 30 years of Professional Experience:

City water system manager serving 200,000 residents (10 years)

Civil engineering supervisor for Metropolitan Water District in planning for water supplies in Southern California (20 years)

Elected water board member serving as President (10 years)

Education:

B.S. and M.S. degrees in Civil Engineering

California Registered Civil Engineer

California teaching credential in Engineering

Law Degree and Member of the California Bar

Community Activities:

Adjunct Professor, Santiago Canyon College teaching water utility management

Chairperson, Citizens Oversight Committee for school improvements

Member, Laguna Hills Traffic Commission

My experience in the Southern California water industry and knowledge of the community will be invaluable to ensure better management of the area's water supplies during this critical time.
