

**ORANGE COUNTY WATER DISTRICT
DIRECTOR, DIVISION 2**

NAME: DENIS R. BILODEAU

OCCUPATION: Director, Orange County Water District,
Division 2

It is a privilege to serve as your representative on the Orange County Water District (OCWD). This district manages our vital groundwater basin, which is the source of two-thirds of our water supply.

Since you elected me four years ago, I have kept my commitment to ensure our drinking water remains pure, plentiful and affordable. We built the world's largest advanced water purification facility of its kind, the Groundwater Replenishment System (GWRS), on time and within budget. This project is providing 50 million gallons a day of a new, reliable, high-quality water source for future generations of Orange County residents.

Safeguarding our precious aquifer is my top priority. We have increased testing to ensure our water is free of contamination. I will ensure OCWD continues to hold petroleum companies accountable for chemical (MTBE) contamination. Additionally, OCWD has initiated a groundwater protection project in north Orange County and is pursuing the responsible parties for cost recovery of the cleanup.

With your support, I will keep our water supply uninterrupted for the lowest price possible. Please contact me for more information at my website below.

I respectfully ask for your vote.
